Supply Chain Operations & Technologies ~ Vendor Compliance
Good Governance ~ Fraud-Fighter ~ Turnaround Help

Greetings everyone.

This month I thought I'd point you to an article I was asked to write for the Institute of Supply Management (ISM).

ISM (www.ism.ws) publishes several magazines including *Inside Supply Management*.

My article - which appears in this month's edition - is about protecting against procurement fraud. You can read my article online at:

<http://www.ism.ws/pubs/ISMMag/ismarticle.cfm?ItemNumber=20070>

The tainted pet food scandal of 2007 is highlighted as a procurement fraud case study. Linking quality assurance programs to the procurement process can help protect against this type of fraud.

I hope you enjoy the article and feel free to pass along questions and comments.

Thanks for allowing me to communicate with you.

Norman
